Keys to Successful Selling

Standard Industrial Classification System

3826 – Laboratory Analytical Instruments

Analytical Instruments

Application:

Laboratories use specialized equipment to analyze and test blood, gases or other fluids. This equipment uses special chemicals either in the analysis or the cleaning of fluid lines between tests.

In This Application:

Quick disconnect couplings allow lab technicians to easily replace empty bottles of the chemicals or reagents used. Hose barbs can be used to adapt to larger ID tubing, or a 1/4-28 port adapts micro bore tubing through the use of industry standard compression nuts. Internal shutoff valves keep the lines primed and the lab clean.

Media:

Alcohol, DI water, other reagents

Pressure:

Vacuum to 20 psi

Temperature:

60° F to 80° F

Colder Part Numbers:

PMCD19042812 and PMCD48042812

Features/Benefits:

- Integrated shutoff valves keep the process clean
- Eliminate kinked tubing and loosened compression nuts with free coupling rotation

Features/Benefits:

- Eliminate the tedious task of threading and re-threading
- Reduce labor costs by a simple push of a button – no tools required

All sales are subject to Colder Products Company's limited express warranty set forth in the Colder catalog. Contact your local distributor or Colder Customer Service for warranty provisions.
