Body Cooling Systems

Application

The line connecting the shoulder pad and cooler must have reliable couplings that are easy to connect and disconnect, allowing users to make a clean, fast break.

In This Application

BreakAway™ couplings are ideal for body cooling system connections because they are designed to disconnect when pull force is applied without requiring the user to depress a latching mechanism. This allows a quick and easy break at critical moments for football players, NASCAR drivers, baseball umpires, fire fighters, SWAT teams and the military.

Media
 Air, water, and coolants

Pressure
 0 - 20 psi

Temperature
 0° - 150° F

Colder Part Numbers

- BACD17004MBLK - Black acetal in-line body with shutoff and Buna-N o-ring
- BAC22004MBLK - Black acetal in-line insert, straight thru with Buna-N o-ring

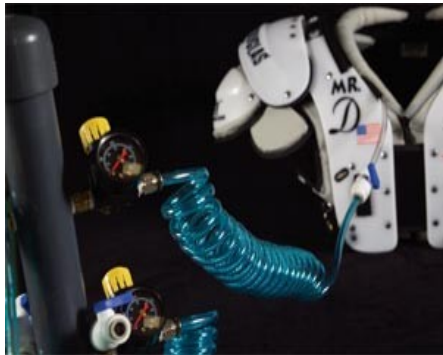

Note: Available in black or white acetal

Features & Benefits

- 1. Reliable break away design**
 - Rapid automatic disconnection
 - Easy hands-free operation
 - Dependable for multiple disconnections
- 2. Automatic dual shutoff valves**
 - Avoid leaks and spills
 - Reduce clean-up time
 - Safe and clean fluid handling

NFL players use air-cooled shoulder pads to reduce the risk of heat related illness.

Features & Benefits

- 3. Streamlined, flush finish**
 - Easy-to-use for maximum productivity
 - Intuitive compact component
 - Developed from proven platform

All sales are subject to Colder Products Company's limited express warranty set forth in the Colder catalog. Contact your local distributor or Colder Customer Service for warranty provisions.
