Keys to Successful Selling

Standard Industrial Classification System

3845 Electromedical and Electrotherapeutic Apparatus

Application:

Non-spill couplings connect fluid cooling lines to medical laser equipment.

In This Application:

Medical lasers are being used in more medical applications and they are becoming more powerful. As a result, increased cooling capabilities are required. The high flow valve in the NS4 allows for increased cooling capabilities, and the non-spill feature keeps the surgical area clean and dry.

Media:
Water or coolant

Pressure:
40 psi

Temperature:
70° F, 21°C

Colder Part Numbers:

NS4D1300606 and NS4D4000606

Features/Benefits:

- Non-spill design keeps the surgical area clean and dry.
- Non-spill design closes automatically and prevents spillage from occurring.

Medical Lasers

Features/Benefits:

- Couplings provide a closed transferred system which increases safety and effectiveness.
- Unique design and overmold creates a product that fits well with the overall look of surgical devices.

All sales are subject to Colder Products Company's limited express warranty set forth in the Colder catalog. Contact your local distributor or Colder Customer Service for warranty provisions.
