Sports Hydration Pack

Application

This application allows on-demand hydration quickly and conveniently. The system consists of a protective pouch, expandable water bladder, tubing, bite valves, quick connect couplings, and 32 ounce refill bottle.

In This Application

Colder APC in-line couplings provide a quick and secure connection from the expandable water bladder to the mouthpiece as well as to the expandable water bladder from a plastic supply bottle.

Media
Potable water

Pressure
< 2 psi
< 0.15 Bar

Temperature
Ambient

Colder Part Numbers

APC17006	Acetal in-line body
APCD22006	Acetal straight thru insert with shutoff

Features & Benefits

Easy to Use

- Fast, intuitive connection provides ease of use
- Audible “click” indicates secure connection
- Easy refilling with quick-fill, non-spill system

Safety

- Prevents dehydration and heat stroke
- Secure, leak-free connection prevents loss of liquid
- Durable materials withstand harsh environment
- Lightweight system holds a full 16 ounces of water

Features & Benefits (continued)

Durability

- Prevents punctures and breakage with durable outer shell

Quality

- Colder components assure long life of system.
- Couplings provide repeated connects/disconnects
